STATE-OF-THE-ART
TECHNOLOGY
NOW IN YOUR BATHROOM

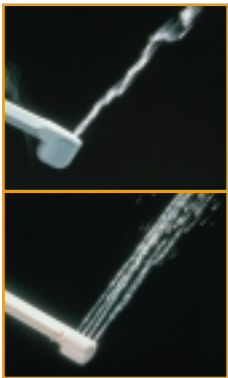

A FRESH APPROACH TO PERSONAL HYGIENE.

ROYALET electronic bidets introduce you to a new level of comfort, luxury and personal hygiene.

The Royalet's elegant stylish design will complement any bathroom and simply replaces your existing toilet seat. The Royalet comes with a range of convenient features designed to leave you feeling fresher and healthier all day long. For decades other cultures around the world have looked to bidets for cleansing because water is more comfortable, more effective, and above all, more hygienic than tissue.

TWIN NOZZLE SYSTEM - HIS & HERS

One nozzle features a solid swirling water jet that gives thorough cleaning of the posterior.

The other nozzle provides softer, gentler cleaning that is more suited for feminine hygiene.

WARM AIR DRYING

Warm air gently dries, with variable temperature control. Excellence and Elite models only.

AIR DEODOURISER

One push button activates a Carbon filter to remove any offensive odours and turns off automatically. Elite model only.

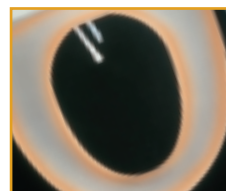

PRESSURE ACTIVATED SEAT & ANTI-SLAM LID

A quick touch and the hydraulic lid and seat close quietly and gently - all models. Bidet only activates once someone applies pressure (sits) on the seat, and deactivates automatically once user stands up - Excellence and Deluxe models only.

DUAL ACTION SPRAY WITH MASSAGE FEATURE

Nozzle moves back and forth automatically, improving cleaning efficiency and blood circulation in capillaries, which helps prevent haemorrhoids and constipation. Elite model only.

WARM SEAT & SELF CLEANING NOZZLES

With adjustable seat warmth, there'll be no more cold surprises on those frosty winter mornings. Also, nozzles are positioned for accuracy and to ensure used water drains directly, without splashing back on your body or the nozzle.

ADJUSTABLE WATER PRESSURE/TEMPERATURE

Choose from 5 different water pressure settings, and 3 water temperature settings for personalised comfort.

ANTI MICROBIAL SEAT

The seat and nozzle are formulated from Anti-Microbial plastics, to help prevent bacteria from contaminating the surface.

Specifications, designs and prices may be changed without notice.
